

ROTATIONAL MOULDING PRODUCTS

Stoner MOULDING HERITAGE

Since 1942 Stoner Molding Solutions have been known for superior performance and consistent quality.

Molders have come to rely on Stoner's world class service and expert solutions for the challenges facing their business.

The Early Years

In the 1950s Stoner was an early innovator of aerosol technology. In the 1960s Stoner's success with lubricants for rubber molding led to the development of release agents for thermoplastic injection. By the 1970s Stoner expanded into polyurethane molding solutions.

During the 1980s new cleaners and rust preventives were added and in the 1990s Stoner developed products for investment casting and melt spinning of polyester and nylon fiber.

Stoner Aerosol Solutions

Widely recognized as a leader in aerosol technology, Stoner manufactures molding solutions for the thermoplastics, polyurethanes, composites, rotational, rubber, fiber, and investment casting industries.

If you have not experienced the Stoner difference, please consider these reasons to switch. Stoner release agents yield better performance than any competitive product. With Stoner, your cost per released part will be lower than any competitive product, so you'll get "More Parts in Less Time." Plus Stoner releases have far less odor than economy brands. Your operators will like the change.

Stoner Expands its Offerings

In 2000 Stoner purchased Zip Molders Edge products and in 2006 acquired the Dwight Products Nix Stix line for polyurethane molding. In 2008 Stoner acquired the Releasomers line for rubber and rotational molding. In 2013 the TraSys brand for rubber and rotational molding was added and the Honey Wax and KantStik brands for composites molding were added in 2014. Stoner's brand portfolio now offers solutions for any molding process. If you can mold it, we can release it.

Stoner ROTATIONAL MOULD CLEANER

Keep your molds in top condition with our robust range of mold cleaners. The Stoner Water Based All Purpose Cleaner offers flexible, water-based cleaning in both 5-litre and 19-litre containers, perfect for tackling a wide array of cleaning tasks. For more specialized needs, the PSI Brand Graphic Adhesive Remover, available in a convenient 5-litre size, effectively removes stubborn adhesives and residues. Whether you need an all-purpose solution or a powerful adhesive remover, our cleaners provide reliable and efficient performance to maintain the longevity and quality of your molds.

Image	Product	Type	Litres	Price
	A538	Stoner Water-based all-purpose mold cleaner	5L 18.9L	\$95 \$299
	Graphic Adhesive Remover	Adhesive remover	5L	\$155

Stoner ROTATIONAL MOULD RELEASE

TraSys release agents provide rotomoulders with efficient, high-quality solutions for smooth demoulding and reduced mould wear. With options tailored for high release, general purpose, light release, and high-temperature applications, TraSys ensures optimal performance and productivity.

Image	Product	Application	Temperature Resistance	Litres	Price
	TraSys 420 General Purpose Release	General purpose release	260	3.8L 18.9L	\$180 \$794
	TraSys 414 High Release	High release	260	3.8L	\$200
	TraSys 715 Light Release	Light release	260	3.8L 4 x 3.8L	\$150 \$500
	TraSys 500 General Purpose High Temp	General purpose high temp release	315	3.8L	\$230

ENHANCE THE SURFACE

PSI Brand Enhance Surface: This product is specifically designed to improve the surface quality of molded parts. It helps in achieving a smoother, more uniform finish, which is crucial for applications requiring high aesthetic standards or tight tolerances. Whether you 're working with intricate designs or seeking a flawless appearance, PSI Brand Enhance Surface ensures your molds deliver top-notch results.

Image	Product	Application	Litres	Price
	Enhance	Specifically formulated for removal of surface pitting on polyolefin products and filling voids, tight radius, threads and other difficult to mould areas.	5L	\$200
	Application Spray Gun	For Enhance and Release Agents	0.5L Cup	\$150

Stoner ROTATIONAL MOULD PROTECTION

Stoner provides top-notch solutions for mold protection and maintenance. Stoner M520 Zip Slip ensures smooth parting line releases, preventing damage and sticking. For rust prevention, A612 offers short-term protection, while A677 provides long-term defense. These products are designed to enhance mold performance and extend equipment life, ensuring your operations run smoothly.

Image	Product	Purpose	Sizes Available	Price
	M520 Zip Slip Parting Line Protector	Prevents sticking and damage on parting lines	1L	\$220
	A612 Thin Film Rust Preventative - Short Term	Short-term rust prevention	355ml 12 x 355ml	\$20 \$200
	A677 Heavy Duty Rust Preventative - Long Term	Long-term rust prevention	355ml 12 x 355ml	\$20 \$500
